

Keep Loudoun Beautiful

The last time you were driving, did you see any trash on the road? Well, I have seen too much trash on the road. In my backyard sometimes I see trash. All the trash comes when people use open top recycle bins or trash cans. It's not just there, it is everywhere.

Reduce, Reuse, Recycle are called the three R's. The three R's are an awesome way to help out Loudoun and yourself to stay eco friendly. Help clean up Loudoun by reducing old stuff into something new. For example, reusing plastic water bottles to make plant holders. Simply recycle all that you can in your house.

Composting is a great way to reduce some of your trash. An area outside or a special bin can be used to make a compost pile. A compost pile is where you put food waste. Another way to keep Loudoun Beautiful is by planting a garden. Gardens in the winter can be a source of food for animals.

So those are some ways you can prevent Loudoun from getting polluted. If you follow these examples we can do a better job of keeping Loudoun beautiful. Thank you for reading and please keep Loudoun beautiful.
