Keep Loudoun Beautiful
By, Maggie He
Belmont Station – Grade 2

Would you rather live in a dirty, polluted, grayish place or a very clean and happy place? Well, I think you would pick choice two. Here are some ways to keep Loudoun clean. First, don't cut down trees! Instead, plant trees flowers, bushes, shrubs and more. Second, use the three Rs (Reduce, Reuse, Recycle). Recycle means recycling plastic, paper, and cans. Reuse means reusing plastic bags, paper, and water bottles. Reduce is reducing the amount of water you use everyday. Did you know trees give off oxygen and absorb carbon dioxide? Did you know there are more trash cans in the world than recycling bins? Third, don't litter! Animals may eat your trash! They can get very sick and die! Animals can make Loudoun County beautiful, too. For example, we all benefit from bees, butterflies, deer, and ducks. Don't throw litter on the ground. Throw trash in trash cans and recycling bins. Fourth, protect animal habitats! This means, don't cut down a lot of trees! Don't pollute our lakes and ponds. So, now you know how important it is to KEEP LOUDOUN BEAUTIFUL!
