

Keep Loudoun Beautiful

By: Nicole Paddock

This essay will explain how to keep Loudoun beautiful. You can mow your lawn, plant flowers, pick up trash, and recycle.

Picking up the trash is important for the ocean because the animals that live there could get stuck in trash, and that could lead to severe injuries to the fish and other marine life.

You should mow the lawn because ticks and other types of bugs can bite you. Also 25-foot-tall grass does not look very pretty, and we want to keep Loudoun beautiful.

You can plant flowers so your yard looks pretty and if you're a person that likes doing crafts then you might want to look at planting some flowers.

Recycling is good for our earth because if you recycle the stuff you don't want, it can be turned into everyday items.
